DIRECTIONS

For Toilets - It is not necessary to remove the water from the bowl. One ounce is sufficient to remove soils, rust, lime, scale and uric deposits and deodorize.

Open flip can, invert bottle and with light pressure, direct stream completely around underneath side of toilet bowl rim. Allow at least 10 minutes contact time for surface to be cleaned. Wet bowl mop in solution and swab all surfaces including seat and lid. Rinse. Repeat application for cleaning heavily encrusted deposits.

On Solid Porcelain Urinals - Place bowl mop over drain. Add enough water to make a solution and follow the same procedure as for toilet bowls. Will not damage solid porcelain china or vitreous ware.

Shower Stalls - Glazed or other ceramic tile and grouting may be cleaned without damage. Use one ounce in a gallon of water, allow 10 minutes contact time for surface to be cleaned, rinse thoroughly.

May be used on most metals (including aluminum and stainless steel) at 1 ounce per gallon of water. Rinse thoroughly. On chrome or porcelain enamel, dilute 1 part to 4 parts of water and allow only a few moments contact time. Rise well with water. Do not use on chipped or cracked surfaces of these materials. Septic tanks will not be affected.

DANGER

CORROSIVE: May be fatal if swallowed. Do not breathe vapor fumes. Produces chemicals burns. Do not get in eyes, on skin or on clothing.

ANTIDOTE: Internal - Call a physician immediately. Drink a teaspoonful or more of magnesia, chalk or small pieces of soap, softened in water with milk or egg whites. External - Eyes-wash with water for 15 minutes. Get prompt medical attention. Skin-Wipe off acid gently, immediately flood the surface with water, using soap freely, then cover with moist magnesia or baking soda.

**DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.
RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD IT.**
