WASH WITH PLENTY OF WATER.  
GET MEDICAL ATTENTION IF IRRITATION PERSISTS.

Product # L036  
1 GALLON

A labor saving, high-speed cleaner/gloss restorer that is formulated for use with automatic scrubbing equipment or with damp mopping equipment. This product cleans light dirt off the floor surface while leaving a microcoating of thermoplastic that can be burnished at once to a "wet look" gloss. This product can be polished with all speed machines ranging from 175RPM - 3000RPM. Ultra high speed machines will quickly produce the maximum "wet look" gloss. This floor cleaner and restorer extends the life of your floor finish without any buildup.

#### **DIRECTIONS:**

*Dust mop floor surface prior to use of product.*

#### *• Applying with Automatic Scrubber •*

1. Dilute 5 ounces of product per 1 gallon of water in solution tank. In a single pass with an auto scrubber, scrub floors with a polishing pad and pickup used solution.
2. Burnish to a high gloss with a high speed machine equipped with a burnishing pad. If a high speed machine is not available, a lower RPM machine (175RPM) equipped with a red buffing pad followed by a white polishing pad will offer excellent results.

#### *• Applying with Damp Mopping Equipment •*

1. Dilute 2 ounces of product with 1 gallon of water. Damp mop floor surface & allow solution to air dry.
2. Burnish to a high gloss with a high speed machine equipped with a burnishing pad. If a high speed machine is not available, a lower RPM machine (175RPM) equipped with a red buffing pad followed by a white polishing pad works great.

INGREDIENTS: WATER CAS# 7732-18-5, NONYLPHENOL POLYETHYLENE GLYCOL ETHER CAS# 127087-87-0, GLYCOL ETHER CAS# 111-77-3, ACRYLIC POLYMER CAS# 23035-88-5
