FLOOR FINISH EMULSIFIER

WARNING

KEEP OUT OF REACH OF CHILDREN

CAUSES BURNS. CONTAINS AMINES AND OTHER
CAUSTIC INGREDIENTS. Do not get in eyes or on skin.

Wash eyes or skin with plenty of cool water. **CALL A PHYSICIAN.**

FOR INDUSTRIAL & INSTITUTIONAL USE ONLY

E·Z Strip

A "MOP ON-VAC OFF" FLOOR FINISH EMULSIFIER that penetrates, softens and strips old finish build-up without machine stripping. Recommended for use on all resilient floors as well as terrazzo, marble, slate, travertine, clay and ceramic tile floors. Safe when used as directed.

DIRECTIONS

- For heavy build-up, dilute 1 part product with 4 parts water.
- For moderate build-up, dilute 1 part product with 8 parts water.

Apply with a mop, sponge, or sprayer. Allow solution to set for 5-10 minutes. Pick up emulsified finish with a wet vacuum and rinse well. (For ideal finish adhesion, a floor neutralizer is recommended.)

Let the floor dry thoroughly before applying a seal or finish.

CAUTION

On old asphalt tiles, stripper may cause "bleeding" of the color. It is best to check a small unnoticeable area first. If "bleeding" occurs, do not use a much more diluted solution.

INGREDIENTS: Amine CAS #141-43-5, Sodium Hydroxide CAS #1310-73-2, Sodium Silicate CAS #1344-09-8
