1 GALLON

## Industrial Green

### INDUSTRIAL LIQUID HAND CLEANER

- Ground Walnut Shells•
- Lotionized with Skin Conditioners•
- Biodegradable•

KEEP OUT OF REACH OF CHILDREN  
WARNING

MAY CAUSE EYE IRRITATION  
MAY BE HARMFUL IF SWALLOWED

A powerful liquid hand cleaner with ground walnut shells, that cleans and lifts the toughest of grease, soils and dirt as it exfoliates the skin's surface. Excellent for industrial or shop hand cleaning areas.

This mildly abrasive hand cleaner can be used with or without water. Can thoroughly clean hands and arms of imbedded dirt, inks, tar, grease, gasket cement, carbon black, paints, varnish, rubber cement and more. Due to the special lotionized skin softeners added to this formula, this product may be used as often as needed.

#### DIRECTIONS

Use with an inserted hand pump or mount into wall-unit dispensers adaptable to 1-gallon flat-top containers.

- Apply cleaner to wet or dry hands
- Work into hands and cover fingernail areas until soils liquefy
- Rinse away soils with water

May also be used as a waterless cleaner and wiped off with a clean towel.

#### CAUTION

Avoid contact with eyes. Do not swallow. Use with adequate air. Wash or towel dry hands after use. Do not contaminate water, food, or feed by use or storage. Keep container tightly sealed when not in use. Protect from freezing.

#### FIRST AID

EYES - Flush with plenty of water for at least 15 minutes, lifting eyelids to insure complete removal of product from eye. See a physician immediately.

INGESTION - Do not induce vomiting. If conscious, drink plenty of water and then contact a physician or poison control center. INHALATION - Get to fresh air. If breathing has stopped, qualified personnel should administer artificial respiration.

SKIN - Wipe off with a rag or cloth. May be washed off with water.

INGREDIENTS: Water CAS#7732-18-5, Hydrocarbon Solvent CAS#64742-88-7,  
Ground Walnut Shell CAS#977069-77-4, d-Limonene CAS#5989-27-5, Glycerine CAS#56-81-5
