

NON-AMMONIATED

SUPER-X STRIPPER

CONCENTRATED FLOOR STRIPPER

CAUTION
KEEP OUT OF REACH OF CHILDREN

1 GALLON

SUPER-X STRIPPER

A non-ammoniated, concentrated floor stripper designed to dissolve metallic crosslinked floor finishes. In addition to its fast penetration and emulsification of floor finishes, it is an excellent grease and soil remover. Its controlled sudsing makes it ideal for using automatic floor machines or for conventional stripping operations.

Recommended for use on all resilient flooring, terrazzo, marble, ceramic, clay tile, travertine, and slate floors to remove old accumulations of seals, wax, and floor finish.

DIRECTIONS:

To remove old floor finish build-up, dilute one part stripper to ten parts hot water. Mop floors using solution freely. Allow solution to stand for five minutes or until finish is dissolved. Best results are obtained when using a floor machine. Rinse floor with clear, cool water, making sure that all old floor finish and stripper are picked up. If possible, use a floor neutralizer to help aid floor finish adhesion. Let floor dry completely before applying new sealer or floor finish.

For heavy floor finish build-up, dilute one part stripper to five parts water and follow above procedure.

INGREDIENTS

Alkaline Hydroxides
Glycol Ethers
