TAKE IT AWAY

Mop on.

Wipe off.

...leaves no residue

WARNING:

Keep Out Of Reach Of Children

Causes Burns. Contains Amines and other caustic ingredients.

DO NOT get in eyes or on skin. Wash eyes or skin with plenty of cool water.

Call a physician.

Zip-It is a "no-rinse," chemically active floor finish stripper which quickly dissolves all water based floor finishes. This stripper reduces the lengthy time required for floor stripping. Safe to use on most resilient floor surfaces including vinyl, terrazzo, marble and quarry tile

Dilution Ratio:	DIRECTIONS
Normal Buildup	6:1 with water.
Moderate Buildup	1:1 with water.
Heavy Buildup	1:1 with water.

Apply diluted solution liberally to floor with a mop or automatic scrubber. A thick application is necessary to dissolve the finish. Aged finishes with many coats will require the use of a stripping pad and floor machine. A light coating of finish can be removed by mop agitation. Remove the dissolved finish with a squeegee equipped wet vac or auto scrubber. **NOTE: DO NOT ALLOW THIS PRODUCT TO DRY ON THE FLOOR AT ANY TIME.** If allowed to dry, the finish will be redeposited on the floor as spots. Keep floor wet with stripping solution. Large floors should be stripped in sections, whose size depends on the manpower for complete removal. Make sure no puddles of stripper remain along aisles, walls or corners. This product is not intended for use on asphalt, tile, rubber tile, linoleum or wood.

INGREDIENTS: Amine CAS#141-43-5, Glycol Ether CAS#111-76-2, Dimethyl Carbinol CAS#67-63-0, Sodium Hydroxide CAS #1310-73-2
